Certified quality since 1994

As a single responsible, ALFRAN guarantees the quality of all its projects, offering its services in a coordinated and integral way, from the engineering of solutions and the high capacity for the manufacture of materials to the supply and installation on-site and final delivery of the equipment.

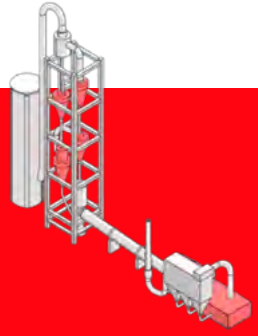

alfran®

Refractory

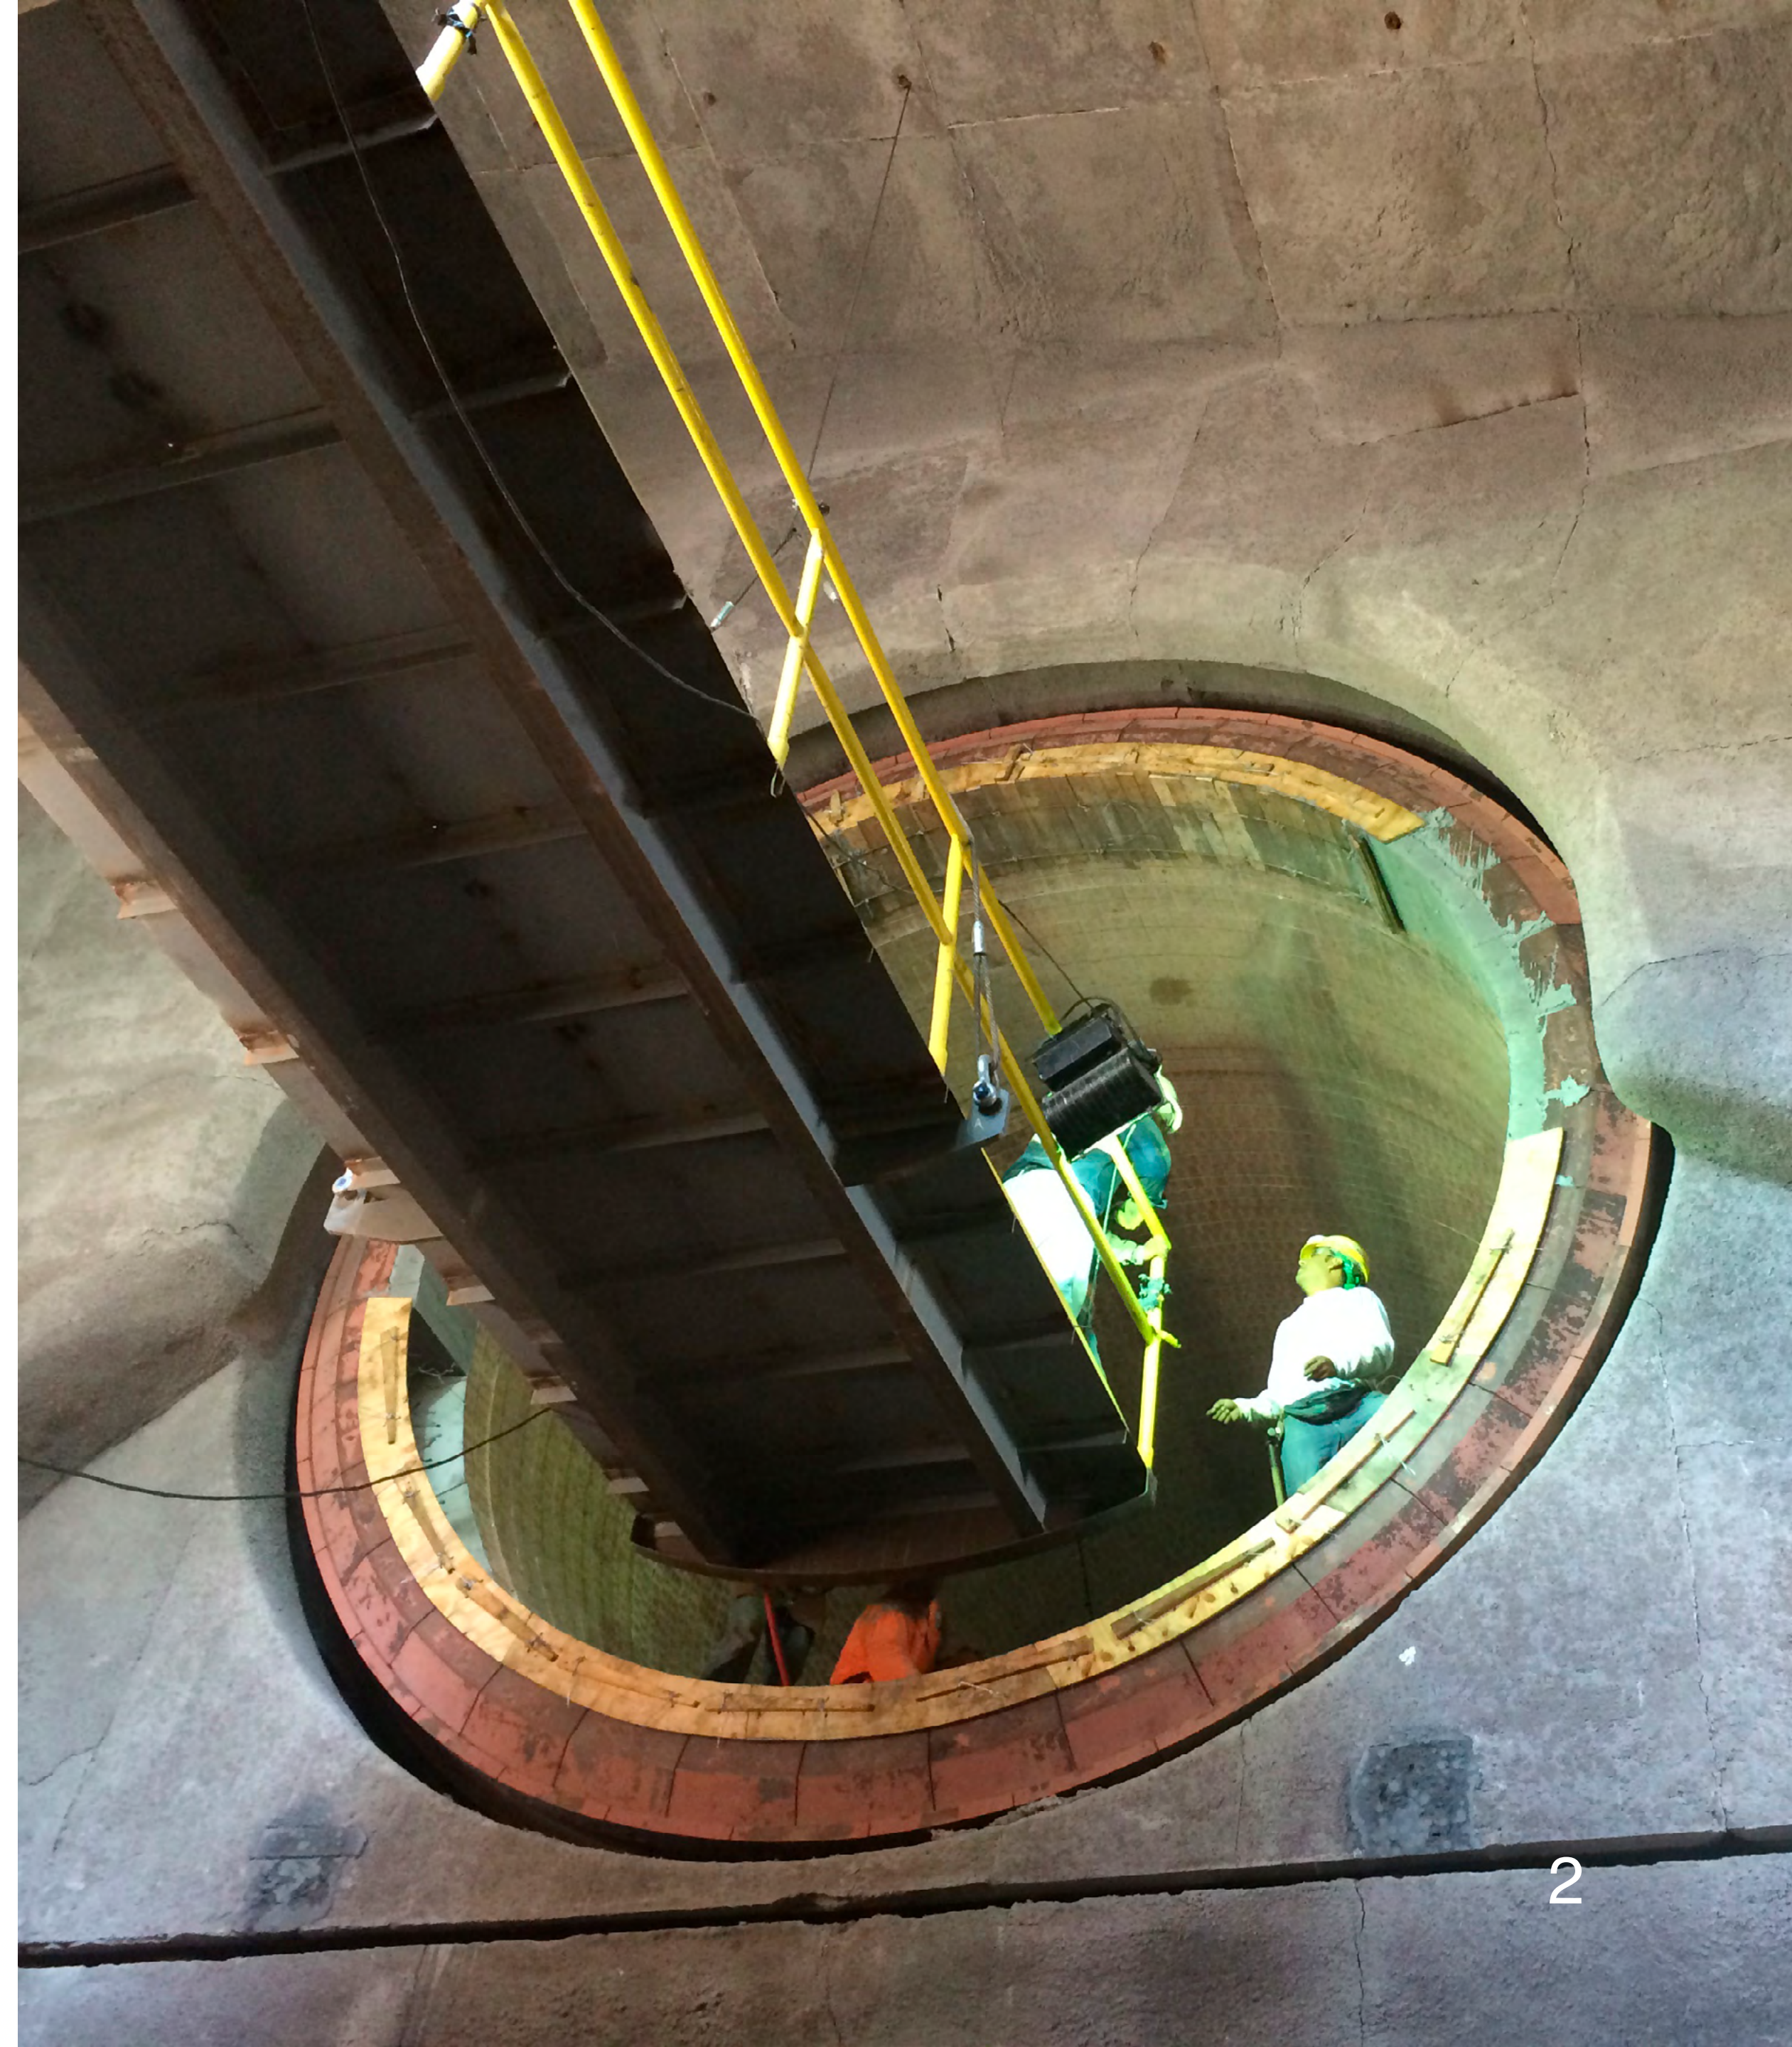

Solutions

Refractory

ALFRAN designs, manufactures and installs a wide variety of refractories for turnkey projects in new production lines and maintenance work.

We have over 85 years of experience as a leading company on the refractory field to protect the core of any industry requiring linings designed to withstand high temperatures and physical&chemical attacks.

Industries

We have extensive experience in the following industrial sectors and their respective equipment.

See all our projects

alfran

Cement:

We are a reference in the cement industry worldwide specialized in high performance refractory castables.

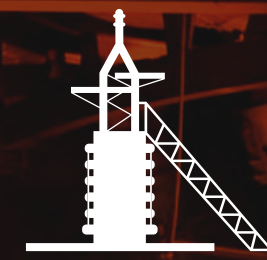

Oil & Gas:

Alfran designs, manufactures, supplies and installs a wide variety of materials and solutions for plant applications in the Oil&Gas sector.

Energy:

Alfran provides products and services for power generation industries such as coal power, nuclear, combined cycles, cogeneration, incineration, biomass and solar plants.

Iron & Steel:

Over the past 50 years, Alfran has become a leading supplier of products and services to the Iron & Steel industry.

Non ferrous metals:

Alfran designs, manufactures, supplies and installs a wide variety of materials and solutions for non ferrous metals industries, such as **aluminum** and copper.

alfranjet[®] & *alfrapump*[®] RANGE

Sprayed & pumped products developed for application by Shotcrete Technology

- ▶ Better Mechanical Properties
- ▶ Very High installation output
- ▶ Both technologies can be applied simultaneously

Wide range of products for application in any area of cement plants:

- ▶ ULCC and NCC castables
- ▶ Very high resistance to erosion and abrasion
- ▶ Application in areas of high thermal and mechanical requirements

WORKPLACE SAFETY

Application place:

- ▶ Cleaner working conditions
- ▶ Lower staff requirements

HEALTH & SAFETY

All tasks must be carried out in Health & Safety conditions, assuming the need for a continuous improvement of the quality in our services and working conditions.

R&D+i

Technology Partner

We own a well
equipped laboratory

We create more value through our innovation
strategy, with ambitious targets and
measurable results.

alnova

Lines of research

Engineering of multilayer coatings for
different industrial processes

Design of refractory materials

Energy Efficiency and Sustainability

More efficient and technology-based
installation methods and equipment

I+D+i

Innovation projects

- Basic concretes, Alfran Mag 85
- Cement-free concrete: Drytech
- Drytech Clean 40 HG
- Tix 80 NW
- Alfran TDZ, Anti-Wear Solution
- Alfran Steel-Tech

Collaborative projects

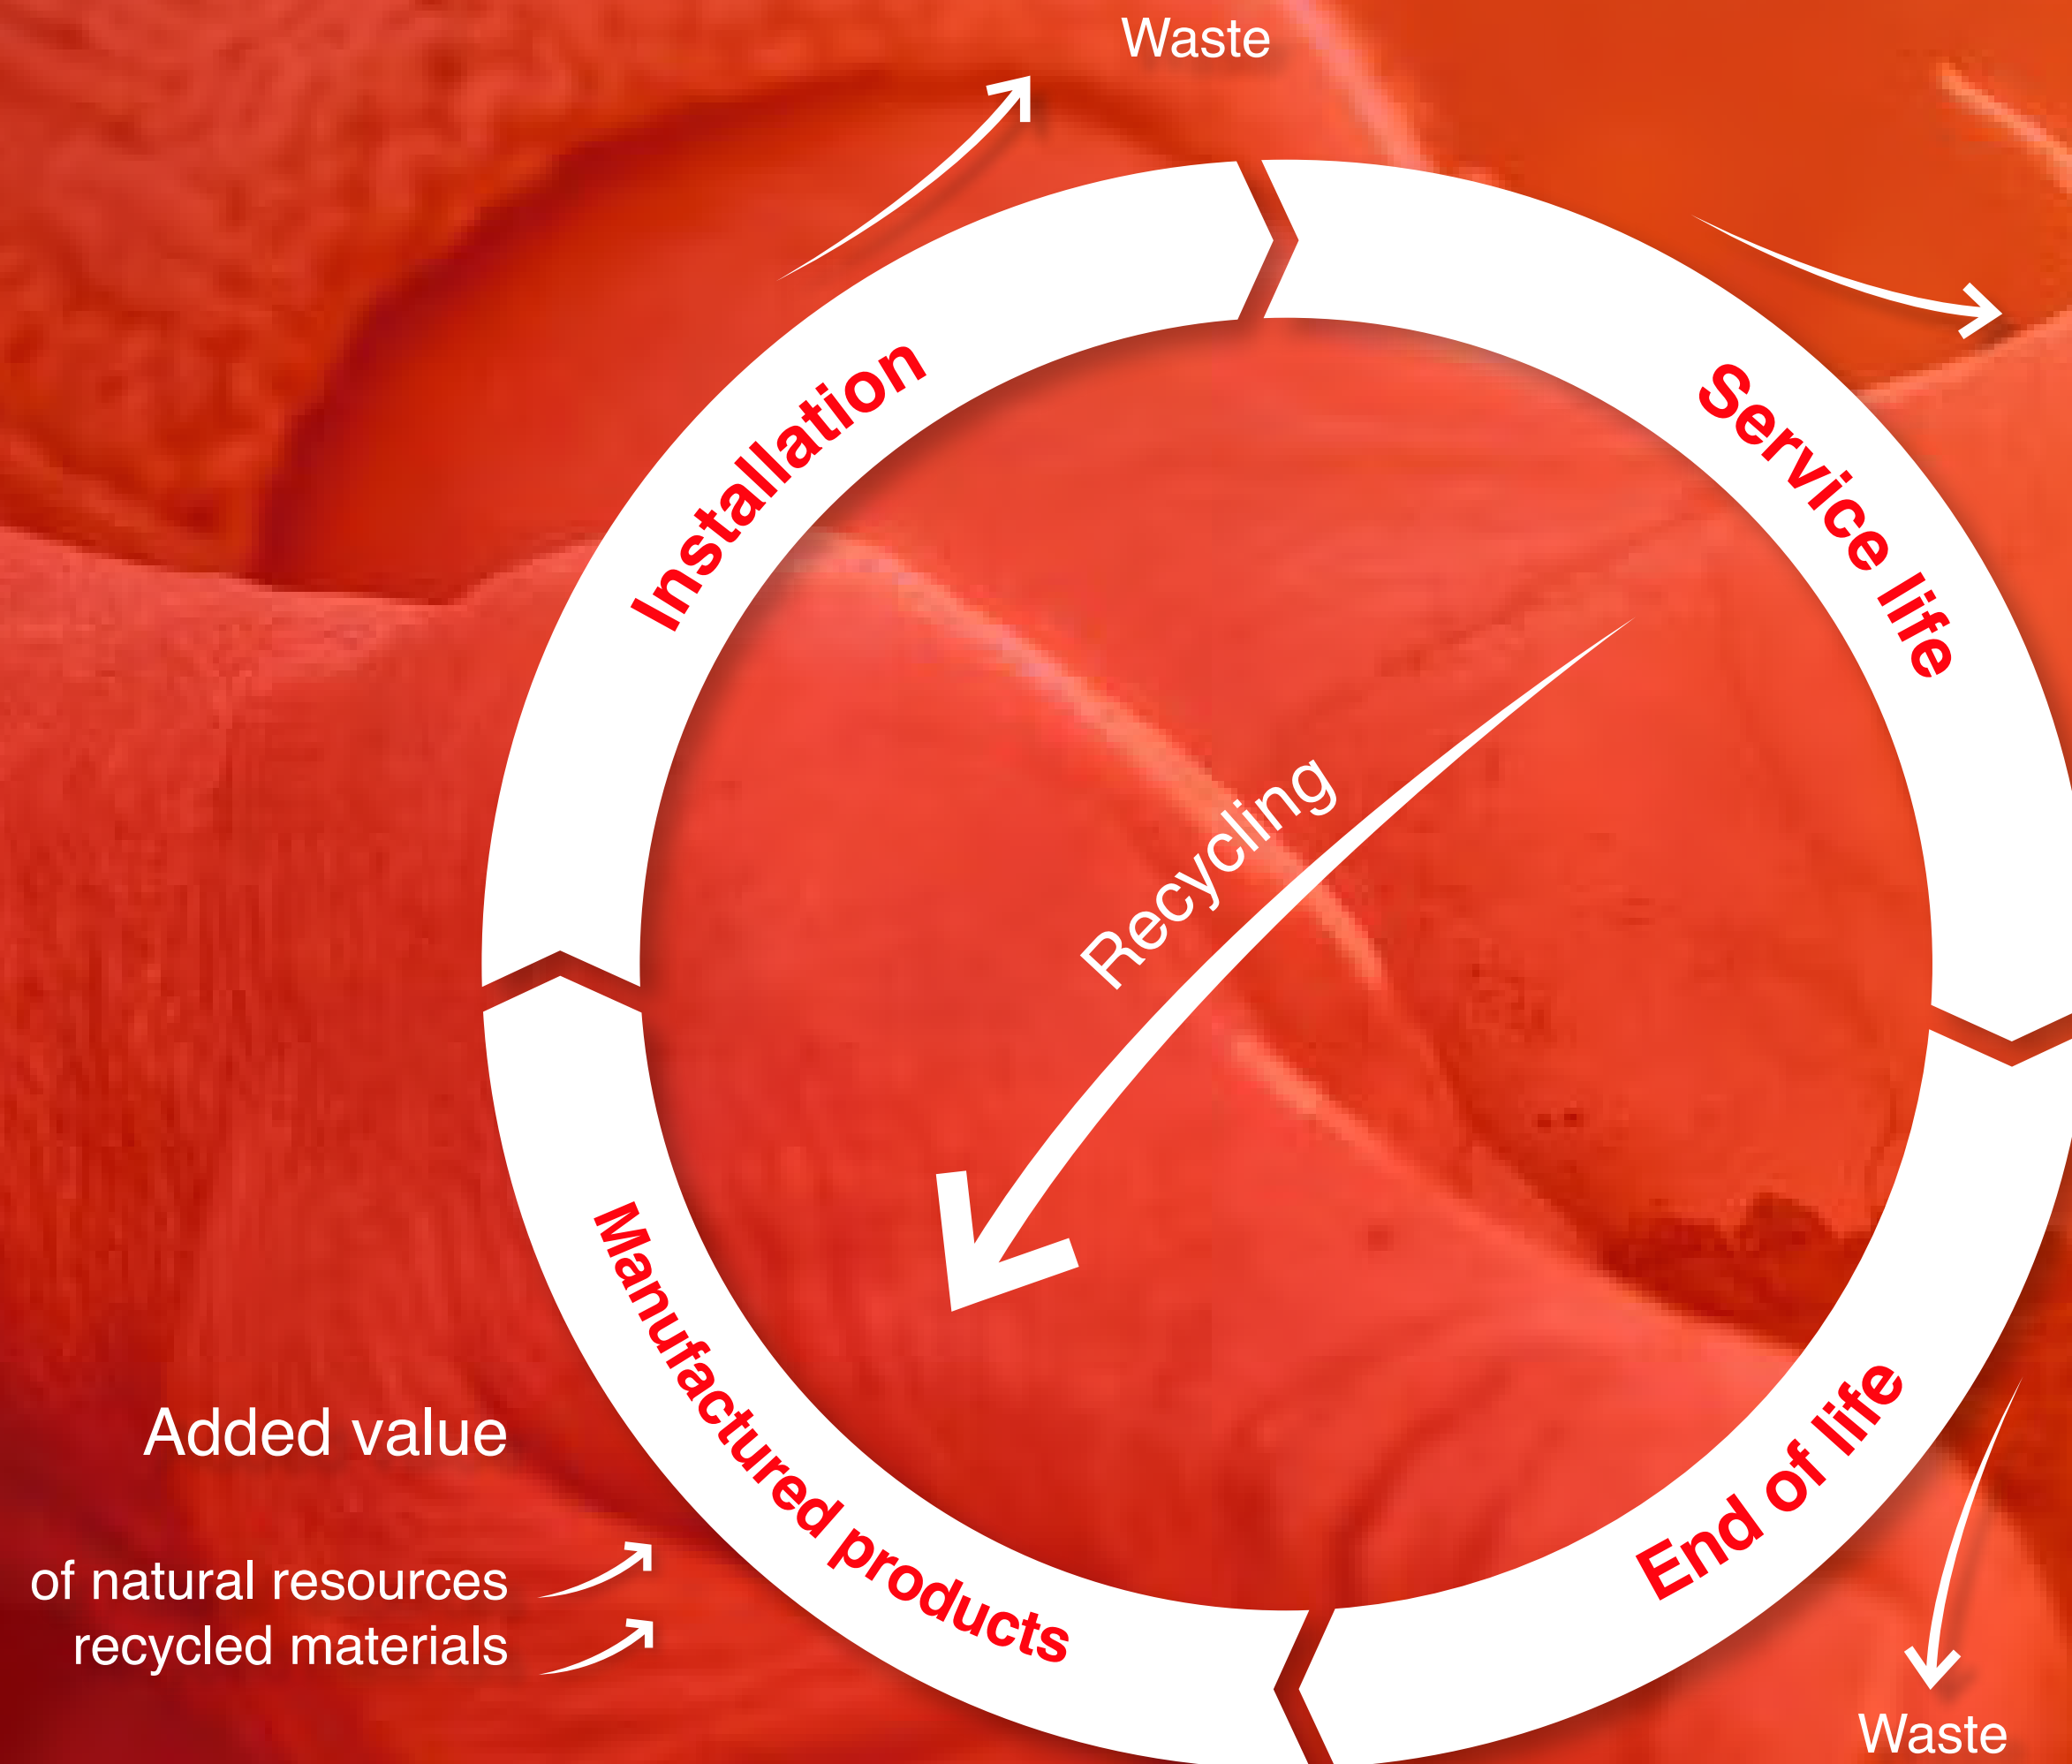

- HORUS PROJECT
- CERES PROJECT
- REFCLIN PROJECT
- NEOSOLAR PROJECT

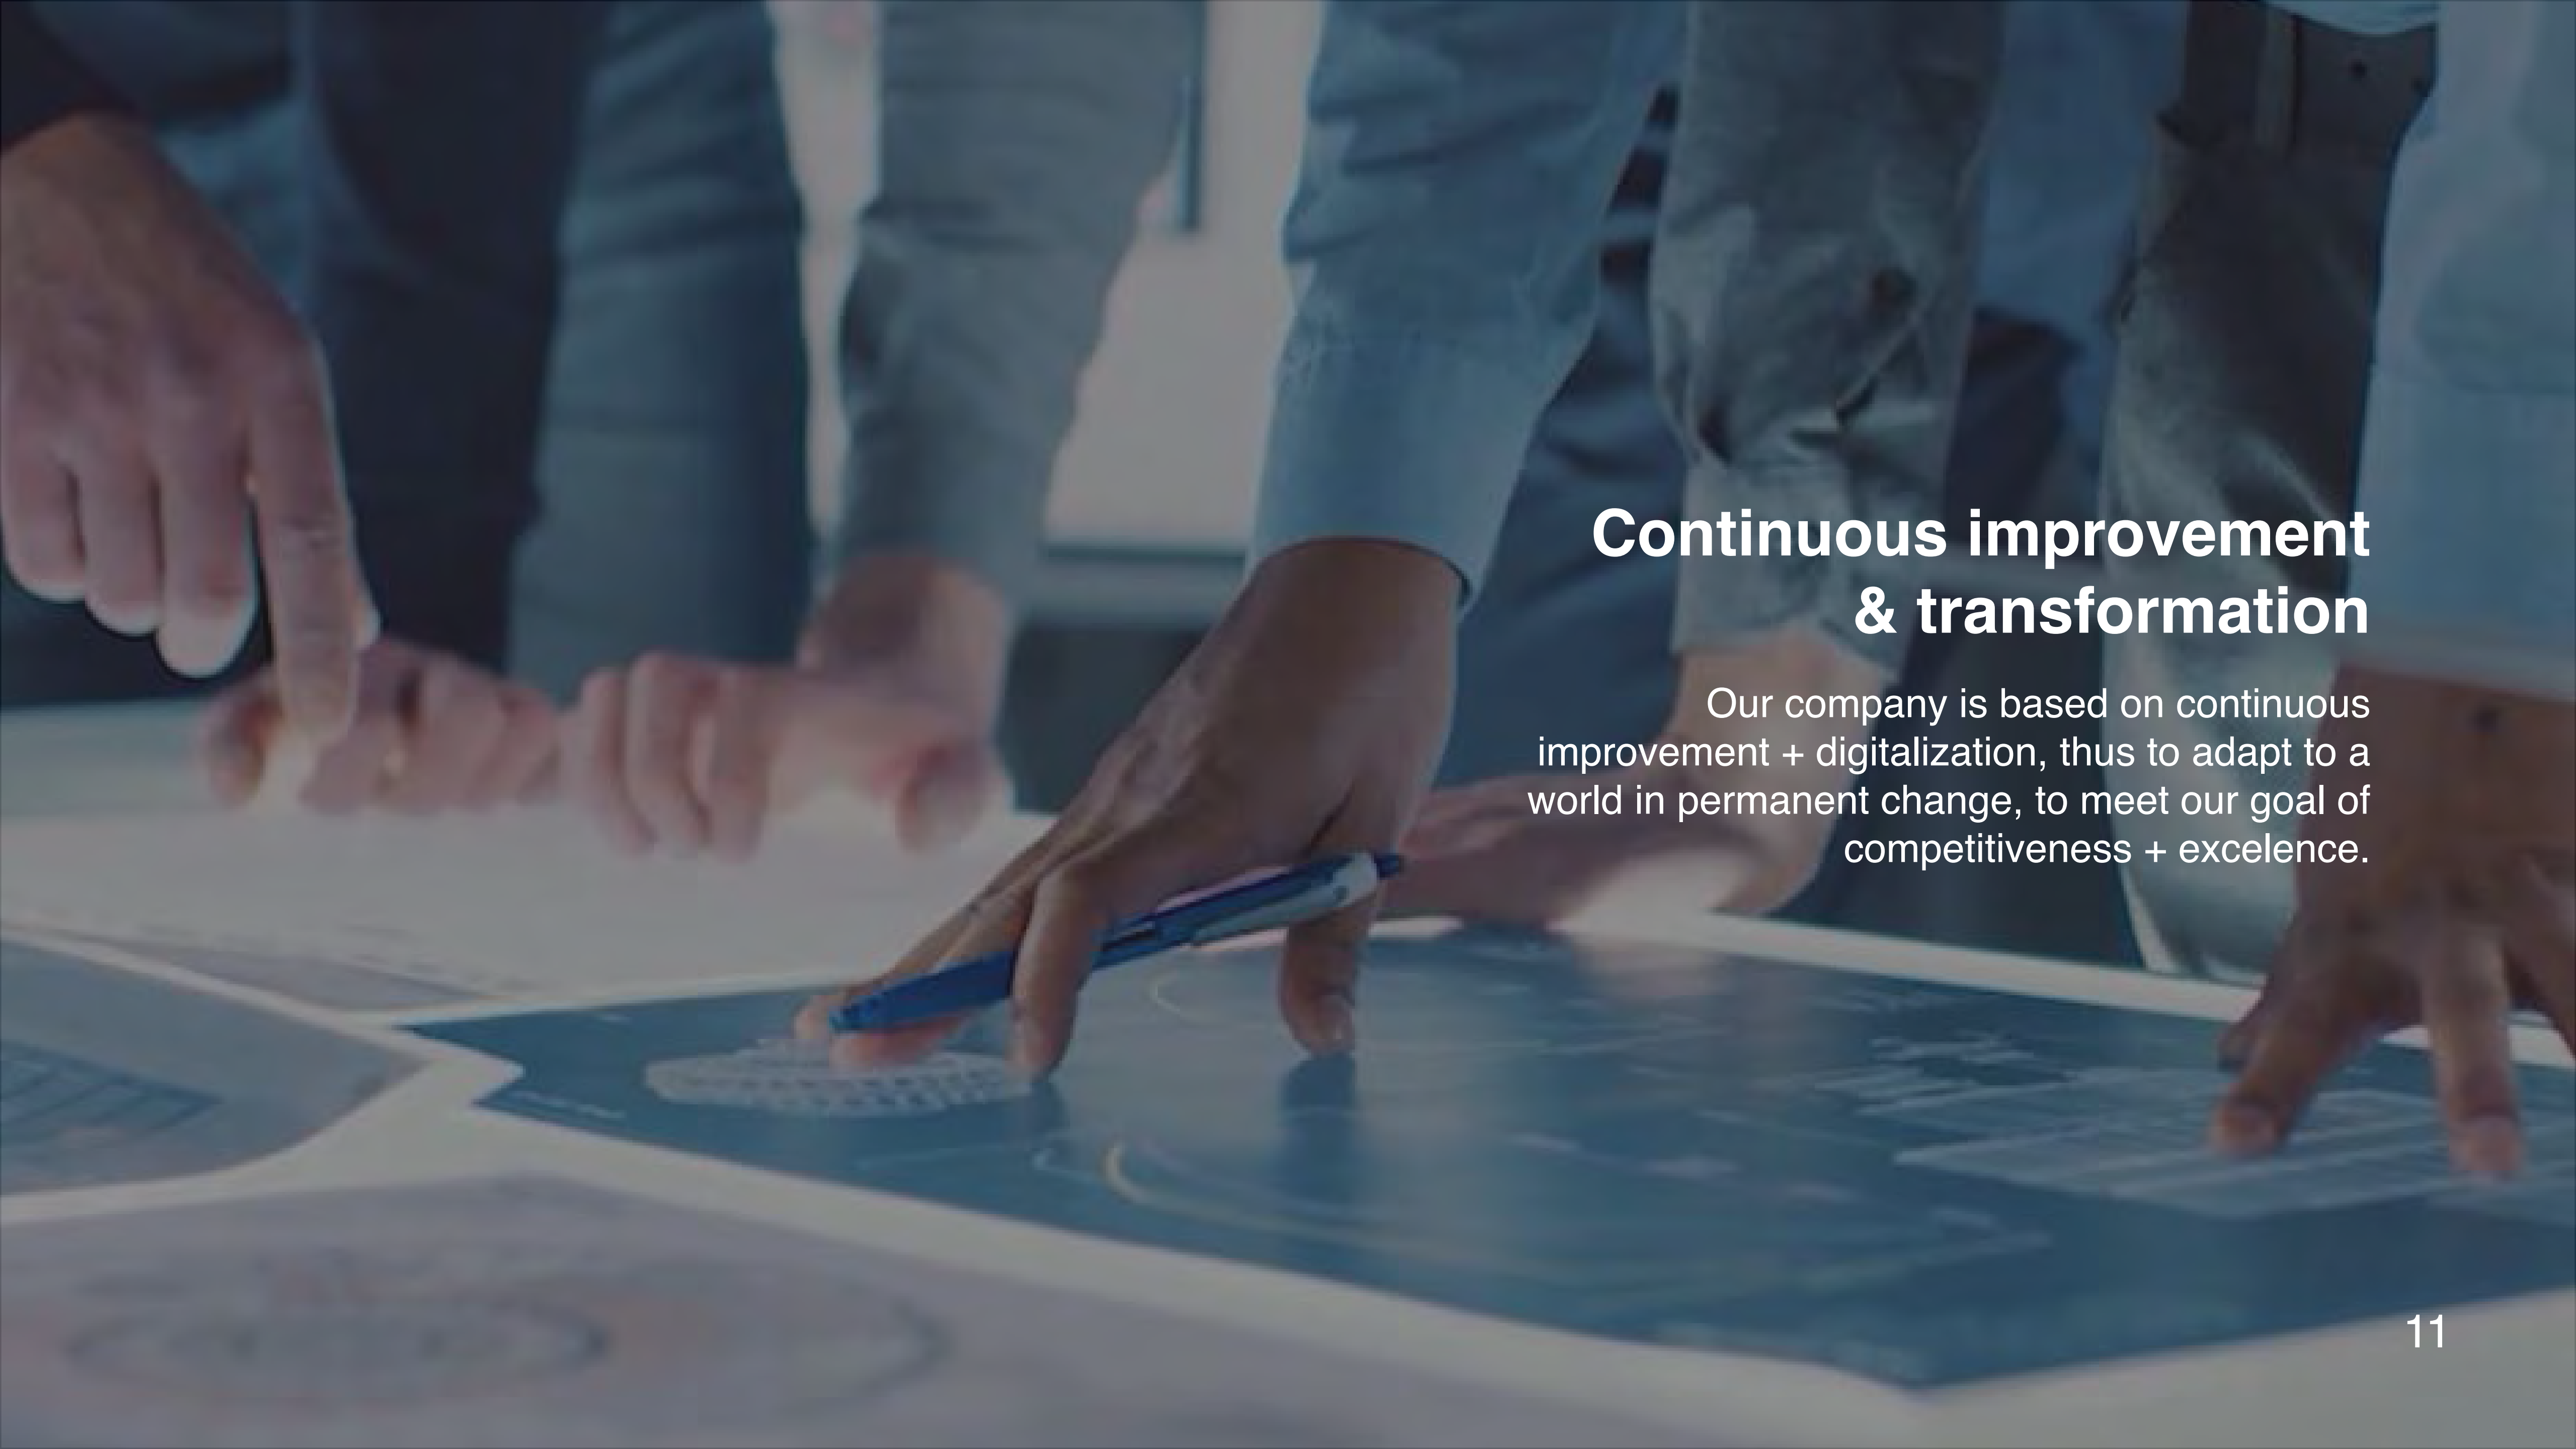

CIRCULAR ECONOMY

We minimise both the consumption of virgin raw materials and waste generation, closing the economic and ecological of resources.

We have reduced the waste of our used refractory materials by

20% to 30%

Continuous improvement & transformation

Our company is based on continuous improvement + digitalization, thus to adapt to a world in permanent change, to meet our goal of competitiveness + excellence.

AVAILABLE Machinery

We possess full equipment to provide refractory solutions, such as:

- Shotcreting Machines
- Dry Out Burners
- Castable Gunning Machines
- Gasoline and Electrical Vibrators
- Brick Cutting Machines
- Demolition Machines
- Planetary Mixers
- Mortar Hand Mixers
- Power Generators
- Air Compressors
- Dry-out Furnace
